

The Power of Clean

STERIS Chamber Cleaning System

AORN recommends regular chamber cleaning in its equipment maintenance supplement to ensure your sterilizer continues to perform to your expectations. Over time, substances accumulate on chamber walls and can contaminate packs and hinder sterilizer performance. STERIS's patented Chamber Cleaning System removes substances from chamber walls, without damaging the surface of your sterilizer.

Our thoughtful process is environmentally safe*. Plus, it is compact and self-contained, so you don't have to shut down adjacent equipment during cleaning.

Before

After

Eliminate chamber residue and see the results:

- Reduced contaminated and rejected packs
- Improved drying and heat transfer
- Easier routine operator cleaning
- Improved sterilizer chamber aesthetics

Call today to schedule your STERIS Chamber Cleaning at a time that works for you and your facility.
