

## Environmental Monitoring Services

Demonstrate control of your critical areas with STERIS's environmental monitoring services.

## Demonstrate control of your critical areas with STERIS's environmental monitoring services.

Our broad spectrum of services are designed to provide you with data on the potential for contamination in your production and other clean spaces. With our staff microbiologists and our in-house, ISO 17025 accredited microbiology lab, we'll work with you to ensure consistent performance and quality, helping you maintain compliance with industry standards.

## Our Services:

### **Viable and non-viable sample collection**

Our trained technicians will help you demonstrate your adherence to USP <797>, USP <825>, and ISO 14698 standards by collecting viable and non-viable samples from your cleanroom, PECs (Primary Engineering Controls) and segregated compounding areas.

### **USP <800> hazardous residue surface testing**

Designed to maintain the safety of patients and staff, these services can help you understand where hazardous drugs may be present, and what opportunities for exposure exist in your facility.

### **Cleaning and disinfection program support**

Our team of specialists will work with you to select the most appropriate chemistries and routines to meet your facility's unique microbial control needs.

### **On-site consultation and Customer training services**

Our experts have the knowledge and skills to help you develop a comprehensive environmental monitoring plan and train your staff on remediation services that comply with industry standards.

### **Laboratory testing and organism identification**

With our in-house microbiology lab, which provides a robust portfolio of sample testing and analysis services, we are ready to assist you in determining organism origin and remediation strategies.

## Why STERIS Controlled Environment (CE) Services?

With decades of experience in critical environments, STERIS is an industry leader and your trusted partner in contamination control. We'll work with you to create a custom environmental monitoring program that addresses your unique facility's needs in alignment with current industry standards. Our team of trained technicians can help you understand and manage the conditions in your controlled environment, so your products - and your people - stay safe.

STERIS also offers a suite of certification and biodecontamination services to help maintain the operational integrity of your clean spaces. Our certification services verify clean air specifications are met for both your cleanrooms and equipment, while our Vaporized Hydrogen Peroxide (VHP®) biodecontamination services are available as routine or emergency services to help control contamination in critical areas. To help you keep your cleanroom free of contaminants, STERIS also provides a complete range of EPA-approved cleaners and disinfectants, available in convenient formats such as pre-packaged wipes and spray bottles. We connect high-quality, innovative products with exceptional service, so you can focus on safely, efficiently and repeatedly producing quality products.
