

Spare Parts Packages

Your organization selected STERIS equipment because of its reputation and high quality output. You can trust the same great value by utilizing authentic OEM parts.

Spare parts packages are designed to lower your risk in the event that your equipment experiences an issue. Your onsite maintenance team can get you up and running quickly using either the basic or full spare parts packages. In addition, using authentic OEM parts eliminates compliance risk and helps get your equipment back to its peak performance.

BASIC (Rebuild your system components)

- Commonly replaced valves, sensors, switches
- Rebuild kits for circulations pumps and motors
- Rebuild kits for control valves
- Memory Card with HMI software

FULL (Install new system components)

- Commonly replaced valves, sensors, switches
- Circulation pumps and motors
- Control valves
- HMI with pre-loaded software
