

GENERAL DESCRIPTION

The Vesta-Syde™ SQ 64 st Ready-To-Use (RTU) Disinfectant Wipes contain a ready-to-use quaternary ammonium-based formula designed to be an effective one-step disinfectant cleaner and cleanroom wipe. It is a gamma irradiated sterile disinfectant wipe used for cleaning of critical equipment in aseptic areas. This product is composed of the disinfectant solution sealed in an inner pouch. The inner pouch and cleanroom wipes are then sealed in an outer pouch. The outer pouch has a resealable label/closure. The inner pouch is designed to burst upon application of pressure by the user. The burst pouch releases the disinfectant solution to saturate the wipes. The outer pouch is sealed in a double bag system to facilitate transport into the aseptic core.

Vesta-Syde SQ 64 st Ready-To-Use Disinfectant Wipes are intended for the cleaning and removal of residues from hard non-porous surfaces in cleanrooms or other critical environments such as floors, walls, counters, tools, carts, and other equipment.

DIRECTIONS FOR USE

Vesta-Syde SQ 64 st Ready-To-Use Disinfectant Wipes are designed to be used on hard non-porous surfaces in pharmaceutical, biotechnology, cosmetic, nutraceutical, medical device, university and government research, and laboratory animal research facilities that employ cleanrooms and other controlled environments. Always remove gross filth and heavy soils before application of the product.

Remove the double bag system. Ensure package opening is facing up. Use two hands to roll one end of the pouch and apply pressure until you feel the inner packet release the cleaning solution. Invert pouch until wipes are fully saturated. Using the resealable cover, remove wipes. Reseal once desired number of wipes have been removed. Using the wipes, wet surfaces thoroughly by spreading manually with appropriate application technique. Allow surfaces to air dry.

Vesta-Syde SQ 64 Ready-To-Use Disinfectant Wipes are a complete product. Do not add other chemicals.
