

Verafit™ Sterilization Bags and Covers feature a patent-pending viewing window that enables visual confirmation of dryness of sterilized parts and equipment, which is required by EU GMP Annex 1 as part of sterilization cycle acceptance. Verafit enables visual confirmation while maintaining the sterility of the product contact surface.

Verafit Sterilization Bags and Covers

Features

Patent-Pending Viewing Window

Constructed with Purefit™, the cleanest flexible sterilization wrapping

Created Specifically for EU GMP Annex 1 Compliance

Custom Sizing

Benefits

Features transparent polypropylene film window.

Enables confirmation of sterilized part dryness per EU GMP Annex 1 requirements.

Produced specifically for pharmaceutical and biotechnology applications.

Reduces the risk of particulate, microbial and chemical contamination per EU GMP Annex 1

Simplifies conformance and improves efficiency.

Verafit bags and covers can be made for parts of almost any shape or size, and are especially well suited for large and bulky items that are difficult to wrap.
