GENERAL DESCRIPTION

Coverage Spray TB Disinfectant Spray is a ready-to-use, quaternary ammonium chloride (quat) based disinfectant spray effective against Mycobacterium tuberculosis (BCG) and other bacteria, the HIV-1 virus (associated with AIDS), Canine parvovirus, and pathogenic fungi.

Coverage Spray TB disinfectant spray is recommended for use on floors, walls, metal surfaces, stainless-steel surfaces, glazed ceramic tile and other hard nonporous environmental surfaces. Coverage Spray TB disinfectant spray is intended to be used in laboratories and veterinary clinics.

NOTE: This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body; or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter sterile areas of the body.

FEATURES BENEFITS

Virucidal  Virucidal activity against Canine parvovirus and HIV-1 (associated with AIDS)
Ready to use  Saves time and labor
Multi-purpose  Cleans, deodorizes and disinfects. Can also be used to control mold and mildew
Serum effective  Bactericidal, fungicidal and virucidal in the presence of organic soil (5% bovine serum)

PHYSICAL PROPERTIES

Form ................................................................. Clear liquid
Odor ............................................................. Lemon
Specific gravity (25°C [77°F]) ................................ 1.01 typical
pH (undiluted) ................................................. 12.2 typical
Flash point ..................................................... Greater than 82°C (180°F)

BACTERICIDAL ACTIVITY

When used as directed, this product is an effective disinfectant against Mycobacterium tuberculosis (BCG) at 20°C (68°F), Staphylococcus aureus, Salmonella choleraesuis, Pseudomonas aeruginosa, Escherichia coli 0157:H7, Methicillin resistant Staphylococcus aureus (MRSA), Vancomycin intermediate resistant Staphylococcus aureus (VISA), and Vancomycin resistant Enterococcus faecalis (VRE).

FUNGICIDAL ACTIVITY

Coverage Spray TB disinfectant spray is fungicidal against the pathogenic fungi Trichophyton mentagrophytes (Athlete’s foot fungus).

VIRUCIDAL ACTIVITY

When used on environmental, inanimate non-porous surfaces, Coverage Spray TB disinfectant spray exhibits effective virucidal activity against HIV-1 (associated with AIDS), Canine parvovirus, Poliovirus Type I, Hepatitis B virus, Hepatitis C virus, Human Corona virus, Hepatitis A virus, Rabies virus, Norwalk virus, Feline Calicivirus and Bovine Viral Diarrhea virus.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
Disinfection, Deodorizing and Cleaning
Remove heavy soil prior to application of the product. Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Allow product to penetrate and remain wet for ten minutes. No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. The product does not leave grit or soap scum.

Mildewstat
To control mold and mildew on pre-cleaned, hard, non-porous surfaces, spray surface to be treated making sure to wet completely. Let air dry. Repeat application at weekly intervals or until mildew growth appears.

Kills HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

Special Instructions for Cleaning and Decontamination Against HIV-1 (Human Immunodeficiency Virus or AIDS Virus) of Surfaces/Objects Soiled with Blood/Body Fluids:

Personal Protection
When handling items soiled with blood or body fluids, use disposal latex gloves, gowns, masks or eye coverings.

Cleaning Procedure
Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

Contact Time
Allow surface to remain wet for 10 minutes.

Disposal of Infectious Materials
Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Storage
Pesticide Storage: Store in dry place no lower in temperature than 10°C (50°F) or higher than 49°C (120°F).

Container Disposal
Do not reuse empty container. Wrap container and put in trash.

Pesticide Disposal
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

SERVICE
Sales
Service is one of the most important ways to verify consistent quality of the facility’s performance and operation. A tailored service program by STERIS provides effective, trouble-free operations.

Technical
STERIS is pleased to provide a completely staffed and equipped technical service laboratory capable of performing needed tests and providing both telephone and on-site assistance when needed. More details on how this service can benefit a facility’s particular situation can be provided upon request.

PRECAUTIONS
Information concerning human and environmental exposure may be reviewed on the Material Safety Data Sheet and the label.
